Chuted 1

Introducing the Chuted 1 in front / out back mail chute designed to be fitted within an exterior wall to receive large amounts of commercial mail at any one time. Mail chutes are ideal for government buildings, schools, surgeries etc. where interior locations are secured. The Chuted 1 mailbox is developed and manufactured to suit the specific requirements of each project and the dimensions of the product can be adjusted.

A mail chute designed for use in external walls and comes in a variety of depths depending on the requirements of each individual project

- Dimensions (mm): 260W x 600H x Variable Depth
- Manufactured from aluminium extrusion and aluminium plate
- An A3 variation of the mail chute is also available at 355mm wide
- Suitable for commercial use
- For external to internal application
- Can be finished in a range of colours from our standard RAL colour range
- Can be produced to suit any project requirement
- Can be fitted with vinyl writing, engraving and name cases for easy identification
- Fitted with a disc tumbler lock as standard
